## Assignment Instructions

> There are 2 parts to the assignment. Instructions, tips and resources are provided below for each task.

> Even if you have no prior programming experience you will be able to do all of it just by following the instructions and applying yourself. Please don't get overwhelmed, YOU CAN DO IT. 👍

### 1. Part 1 (HTML & CSS)

#### Instructions

- In this folder there is an image called "html-css-assignment.png". All you have to do is convert the layout given in the PNG image into HTML/CSS format on this CodeSandbox platform - <https://codesandbox.io>

- You won't need any JavaScript. You can use the following sandbox, as the starting point - <https://codesandbox.io/s/github/codesandbox-app/static-template>

- Write all the HTML/CSS code there and send us the link of the sandbox in response to the email.

#### Tips

You can use following resources to learn enough about HTML to do this task.

<https://medium.freecodecamp.org/learn-html-in-5-minutes-ccd378d2ab72>

<https://learn.shayhowe.com/html-css/building-your-first-web-page/>

<https://www.abeautifulsite.net/how-to-make-rounded-images-with-css>

### 2. Part 2 (Basic JavaScript)

#### Instructions

- Create an account on <https://codewars.com>. It's a problem solving platform. A problem on the platform is called a 'Kata'.

- Start solving problems on <https://codewars.com>. There is no such limit, or minimum requirement, solve as many problems as you can before the given date.

- Send us your codewars profile via email. We would like to see the progress you have made.

#### Tips

- You can learn basics of JS from <http://javascript.info> or <https://www.learn-js.org/> which ever you feel comfortable with.

- CodeWars, the platform, might take some time to getting used to. Try to figure out how to use it, Google is your friend. Again, don't give up. YOU CAN DO IT.

**Best of luck!**
